

Topic 5 – Lesson 2 Assignment

Knowledge Integration

GPT Name

AI/ML Interview Mentor

Knowledge File

Uploaded Knowledge File:

- AI_ML_Interview_Notes.pdf
-

Modified Instructions

Prefer Knowledge File Content

Always use the uploaded knowledge file as the primary source of information when answering user questions. If the required information is available in the knowledge file, base the response on that content.

Avoid Hallucinations

Do not create or assume information that is not available in the uploaded knowledge file. If the answer is not found, politely inform the user and recommend providing additional information or another document.

Testing

Test Question 1 – Factual Question

User:

What is Machine Learning?

GPT Response:

According to the uploaded knowledge file, Machine Learning is a branch of Artificial Intelligence that enables computers to learn patterns from data and make predictions without being explicitly programmed.

Test Question 2 – Misleading Question

User:

Does the knowledge file say that Python is a database?

GPT Response:

No. The uploaded knowledge file does not state that Python is a database. Python is a programming language.

Test Q&A Results

- The GPT used the uploaded knowledge file as the primary source.
- It answered factual questions accurately.
- It rejected misleading information instead of generating false content.
- The responses remained consistent and reliable.

Evaluation Criteria

Accuracy of Responses

The GPT provided accurate answers using the uploaded knowledge file and avoided unsupported information.

Correct Use of Source Content

The GPT preferred the uploaded knowledge file before using general knowledge and clearly avoided hallucinations.
